

Enhancing workplace collaboration and security through document version control for a leading construction giant

Business Challenge

Being a construction giant, the client's on-site design team worked on multiple design documents, requiring the whole team to be updated on the latest document version. Any confusion led to delays in updates to the on-site team leading to a lot of construction rework.

Below were the challenges faced by the client:

Massive amount of data

Need to access the old designs along with the latest version

Frequent changes to the design and delayed updates

Our Solution

The customer partnered with Motherison Technology Services to overcome these issues and attain optimal document management engagement, we helped the client implement eMPro-Docs in their existing setup, which included the below alterations:

- Version management support
- Allowing the uploading of multiple versions of the same file
- Latest version accessible to the whole design team

Benefits Derived

Real-time design updates to the on-site team

Increased document collaboration

About The Partner

Motherison Technology Services is a global technology company that offers a consulting-led approach with an integrated portfolio of industry leading solutions encompassing the entire enterprise value chain.
