

CLOUD SERVICES

Enabling business scalability & flexibility to achieve operational excellence

Move to cloud to accelerate your business

Today enterprises need to compete at scale and speed faster than ever before. This means understanding customer needs, keeping up with the latest data security mechanisms, the need for high levels of availability & resilience in systems, generating new revenue streams, interacting with changing partners and supplier. To capture all of these in a meaningful way and seize the opportunity in the current business environment enterprises need to focus on Cloud.

Cloud has emerged as mainstream for enterprises of any size, geography, or vertical. It is helping drive innovations at a fast pace, reducing the cost of failures, and is assisting enterprises in focusing more on business.

The urgency of cloud

Globally, the total spending on cloud services is growing at **16.5% (CAGR)** and is expected to touch **USD 345 billion** by **2022** (Source: NASSCOM)

50% of US government organizations have migrated to cloud

(Source : Gartner)

The global public cloud service market is projected to reach **\$266 billion** in **2020** (Source : Gartner)

By **2022**, a shift to the cloud will affect over **\$1.3 trillion** in overall IT spending (Source: Gartner)

Start your cloud adoption with us

Motherhood Technology Services offer scalable, flexible, and secure cloud solutions for your ever-increasing business needs to help you stay at the forefront. We focus more on the business outcomes and help our customers navigate digital transformation and adopt a cloud-first strategy with our holistic offerings. As a Managed Services Provider (MSP), we invest in continuous skill development adoption thereby helping our customers enhance their IT operations.

In this era of unpredictability, we eliminate the unwanted surprise element for your business by providing our robust, performance-driven offerings and solutions. We ensure your organizational readiness in these tough times while leveraging our expertise and proven cloud strategy.

Our innovative CROPS concept

To seize the opportunity

We use Well-Architected Review (WAR) as a tool to harvest more valuable “CROPS” (Cost, Reliability, Operational Excellence, Performance Efficiency, Security) for our valuable customers. We help you make informed business decisions, learn best practices, and ensure the optimal solution based on these five pillars:

Cost optimization

Avoiding unnecessary costs

Reliability

Preventing and quickly recovering from failures

Operational excellence

Running and managing systems to deliver utmost business value

Performance efficiency

Using IT and computer resources efficiently

Security

Protecting information and systems

Our Cloud consulting & managed services capabilities snapshot

Get cloud from people who know how

- Pool of certified cloud professionals to help you gain efficiency in cloud architecture Vast experience in delivering world-class cloud solutions & services to premium customers from different industries
