Domain

Financials, Manufacturing and Shop Floor Execution System, Demand Management, Utilities, Human Resource Management, Supply Chain Planning and Management

Industry

Retail, Health care, Shared Business Services, Hi-Tech, Logistics and Warehouse Management, Discrete and Process Manufacturing, Financial Institutes

Improvement in Demand Forecast and Helped Meeting Demand Variability for a **Hi-tech Retailer**

The Need

Business Challenge

- Inability to meet changing customer demand and marketplace.
- Replenish store with right product in right quantity at right time.
- High Cost Associated with supply chain and high amount of lost sales.

Why Motherson Technology Services?

Solution

- Consensus forecast generation for 10k+ items for 52 weeks across all warehouse accounting causal factors.
- **Store Chaining** - Enabled the client to “chain” history from current stores, with granular/aggregate override to accommodate differences product mix
- **Store Replenishment** – Multilevel replenishment from Plant to Warehouse to the final stores. Consider Min order, Max order, Shelf size, Storage size, Backlog and Target inventory
- **Assortment** – Integration of Assortment with Data Model
- **Locking** – Handle overrides in sales at item/location combination w/o impacting other combination

Impact Delivered

- Reduce lost sales owing to stock outs along with optimum replenishment at store and hub level.
- Reduce expediting costs by 50% while maintaining existing service Levels

Propositions

Tools & Technology

Service Delivered

- Product Implementation
- Process Consulting

Enabled Realtime View of Production and Planning for a Consumer Durable Company

The Need

Business Challenge

- Getting real-time figure of production across different units and items.
- Time consumption in issuance of material and booking production leads to sales booking.
- Analysis of deviation between planned vs production in plant.

Why Motherson Technology Services?

Solution

- MES system enabled providing figures for real-time production.
- Every product getting scanned at the end of production line thru barcode, got booked for production in work order.
- Barcode based material issuance: Users don't need to key in item name for issuance. Rather just scanning the barcode will extract the details and need to key in quantity.
- Barcode for Work Order: Report listing all work order will enable shop-floor users to just scan and proceed for production. Thus, provide ease of management.

Impact Delivered

- Reduce man hour cost by 35%.
- Provides real time figures for production and thus analysis of deviation between planned Vs Production
