

Case Study

Secured & Transformed Critical Business Data & Enhance Business Agility

Elevating Construction Management software with AWS: Enhancing Security, Performance, and Efficiency. See how we tackled issues like downtime and data protection, implementing solutions such as AWS Inspector, GuardDuty, WAF, and more, resulting in higher availability, protection, and reliable content delivery.

About the Customer

Founded in 2020, An India-based leading enterprise is at the forefront, delivering construction management software that operates within a common data environment. Software is designed to foster transparency and streamline operations, driving value through substantial time and cost savings, facilitated by robust modules such as Project Cost Control, Inspections, Video Conferencing, and more.

Business Challenges

- Unexpected downtime
- Higher operating cost
- Difficult to protect data
- Improper monitoring
- Unreliable content delivery

Our Solution

- AWS Data security service inspector
- Guard duty for enhanced data security
- WAF to help protect web applications
- Amazon DRS setup on source servers
- CloudFront to ensure reliable content delivery
- ECS Cluster to deploy, manage, & scale containerised applications
- Strategic workload monitoring

Business Benefits

High Availability Solution

Enhanced Protection at all layers

Lower Latency with Reliable Content Delivery Network
