

Migrate and Modernise on AWS with Motherson Technology Services

Cloud migration helps businesses improve productivity, business agility, and operational resilience. It has become essential for organisations to effectively compete in today's faster-paced and data-centric business environment to accelerate business transformation and achieve modernisation.

Why Migrate to the Cloud?

Business Agility

- Reduced time to market
- Increased operational agility (new market penetration, divestiture, acquisition)
- Lowered cost and accelerated pace of innovation

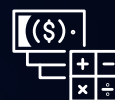

Operational Resilience

- Reduced cost of planned and unplanned outages
- Minimised risk profile or cost of risk mitigation
- Improved service level agreement

Enhanced Productivity

- Automation-driven maintenance efficiencies
- Elimination of hardware-related tasks
- Enhanced developer productivity

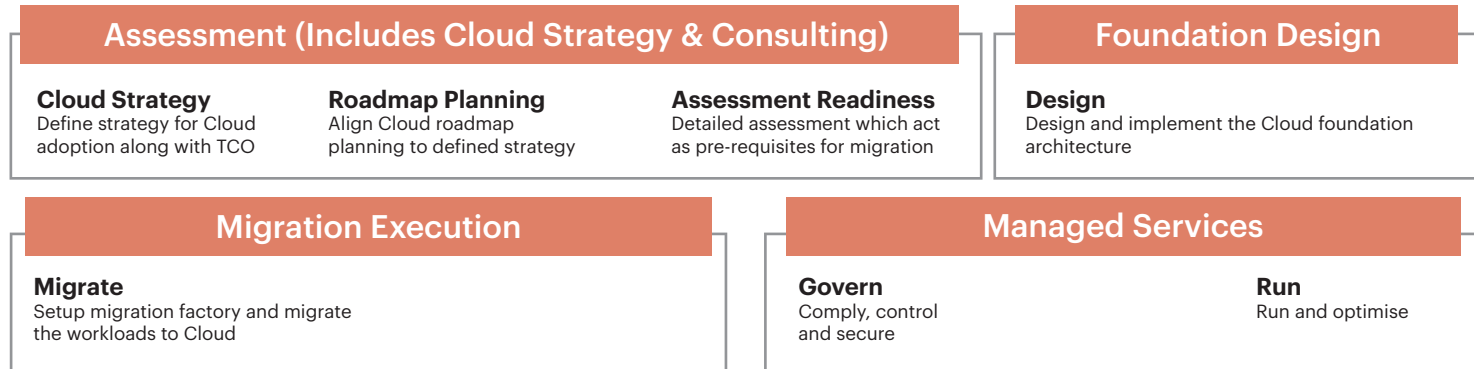

Cost Efficiency

- Ability to match supply and demand, improving utilisation
- Elastic cost base driven by usage patterns
- Elimination of hardware refresh and maintenance programs

Navigating the Migration Journey with us

We are a Migration Competency Readiness(MCR) partner of AWS and helps the customers throughout their migration journey, from assessment, design, and implementation to optimisation.

Migrate quickly with mCOT- Migrate to Cloud in One Tap

Mother's Technology Services mCOT provides a series of reference templates which reflect Cloud best practices. These templates can be used off-the-shelf to quickly build a repeatable enterprise-ready foundation in Cloud. This enables you to focus on deploying your applications on this baseline secure environment. And with infrastructure as code (IaC), you can easily update the foundation as you transform.

Salient Features of mCOT

- Covers End to End lift and Shift Migration Scenarios
- Capable of migrating workload from one Cloud to Another
- Capable of creating a platform in Multi-Cloud Environment
- Capable of integrating Application test cases
- Comes with multiple post-migration use cases and can be triggered as per the requirement
- 50-60% reduction of timelines & Elimination of human errors

Migration Acceleration Program (MAP)

With an outcome-driven methodology, MAP can support you in modernizing and speeding up your cloud migration. With experience and commitment, MAP delivers technologies that save costs, automate, and speed up implementation. MAP employs a tried-and-true three-phased structure to help you reach your migration goals (Assess, Mobilize, and Migrate & Modernize).
