motherson

Motherson Technology Digital & Engineering Services

Transforming Product Vision into Successful Real-world Designs

Finding the Right Integrated Engineering Solutions with Motherson Technology Serivces

We have a wide experience in developing, implementing, and supporting engineering and technical solutions across varied product verticals. Motherson Technology Services, is a one stop shop for your all engineering and design needs

Digital engineering

- Design thinking –UX/UI
- Engineering analytics
- Industry 4.0
- IoT service & platform Enablement
- Connectivity enablement
- Mobility & telematics
- Cloud engineering
- Cybersecurity
- Augmented reality (AR/VR)

Product engineering

- Mechanical engineering
- Hardware engineering
- Embedded software engineering
- Test engineering
- Manufacturing engineering

Cost engineering

- Value engineering
- Should costing
- Design to cost
- Teardown analysis
- Competitive Benchmarking
- Spend Analysis
- Sourcing support

Key Industries Served

- Automotive
- Industrial Products
- LifeSciences
- Manufacturing

Benefits delivered

- Faster time to Market
- Customer driven Innovation
- Reduced lifecycle costs
- Transparency throughout the product development value chain

motherson

Intelligent Data Acquisition & Control System (iDACS)
IoT based ERP/ Machine Agnostic Software solution

Spend Analytics
Supply chain spend optimisation solution

Ossia
Wireless Data and Power transfer solution

Cold Chain
Ensuring visibility of product throughout Supply Chain

Our Innovative Solutions and Accelerators

Rollr
Holistic Telematics Solutions

Business Connect
Productivity and Efficiency Monitoring Platform

ePedigree
Track & Trace Solution for Supply Chain

Patient Care Modules
Digital Platforms for patient care

Our Experience Across Industries

Next-Gen Telematics solution for enhanced transforming customer service & fleet management

- Features Enabled: Vehicle Tracking – Vehicle Health Monitoring – SOS & 24/7 Support – Predictive Analytics
- 10000 + installments in quick time

HMI Application Development for Leading US Welding Equip Manufacturer

- Portable HMI to Interact with Robot System
- UI based on Framework development and components library finalization
- IoT based on a cloud platform and IoT Device Integration

Turnkey New Product Development of portable light therapy wearable glasses for a Medical Firm

- Mobile App Development on iOS/Android and web app to monitor and control the usage
- Mechanical Design and styling
- Hardware Development, Prototype Development
- Software Platform Development and Testing
- Medically Complaints for therapy in Australia and European Union
