

Data-Driven and Analytics-Led Digital Transformation

Reinvent Your Business by Harnessing the Power of Digital and Data Analytics

Is your organisation built to last in an uncertain future? To thrive in the rapidly changing industrial landscape, enterprises must reinvent their business with a renewed focus on customer success.

Digital transformation is driving new business models with the help of technologies, and it is radically improving efficiency and performance of enterprises. We empower organisations to embrace digital transformation by building their digital and data-driven capabilities.

Digital and Analytics Services

Developing business capabilities through the right digital solutions

Harnessing the power of data & analytics to improve operational efficiencies

Applying a design-led, customer-centric approach to create exceptional customer experiences

One Stop Shop for your Digital & Analytics Need

Design Led Consulting

- Digital Transformation framework encompassing technology landscape, people, and processes

Quality Engineering & Security

- Achieve QA excellence across all stages of software development life cycle. DevSecOps frameworks for building innovative solutions

Application Engineering

- Best in class mobile cross-platform
- Web development services
- Legacy Modernisation
- Immersive Interactive Solutions

Data Science: ML, AI Advanced Analytics

- Process Automation, Market Intelligence, improving business predictions, extracting intelligent insights

Data Engineering & Big Data Management

- Utilising advanced data engineering techniques

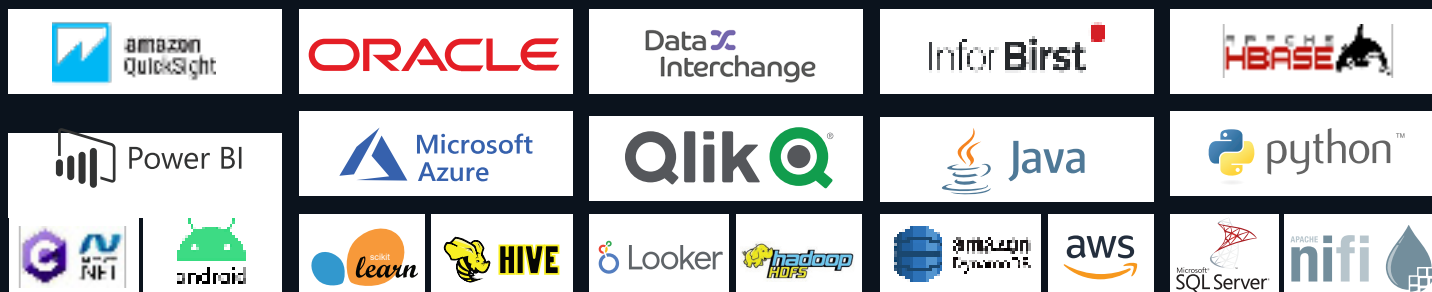

Data Visualisation and BI

- Simplifying complex data interpretations through dynamic dashboards & metric driven notifications

COTS Platform Services

- Microsoft Services
- Salesforce Services

MOTIF Factory Analytics Solution

Amplify your shopfloor efficiency driving operational improvement & enhancing plant productivity

MOTIF FAS is a big data and analytics-based solution suite that enables a 360-degree view of key KPIs driving shopfloor efficiency, enabling agile & flexible operations, and improving plant security and safety

Boost your shop floor operations with

- Production performance monitoring
- Inventory analytics along with quality and downtime analysis
- Predictive maintenance
- Real-time conditioning and monitoring of all the other key KPIs

MOTIF FAS is a flexible customisable solution that can easily integrate with any ERP and MES. It is a device-agnostic (web & mobile) multilingual solution.

IoT & Blockchain Powered Smart Warehouse Management Solution

One Stop Solution with end-to-end traceability of inventory in real-time

Morango Ledger is a smart warehouse management system that provides 360-degree visibility of the warehouse from gate entry to dispatch communication

Improve your warehouse performance by

- Optimises total warehouse space
- Locate inventory optimally to reduce time travel
- Integrating it with accounting & ERP systems
- Having a global view of inventory with real-time traceability

Morango Ledger is a cloud compatible solution with boasting features like bulk receiving, priority picking codes by part numbers, bulk put away: by pallet/box, splitting & consolidation of serial, cross docking, printing custom labels, sequential shipment/FIFO, dashboards, reports & vendor portals.

Case Studies

Empowered a Consumer Electrical Giant to Embrace a Data-driven Approach for Effective Decision-making (in real-time)

Problem Statement

The customer was looking for a service provider who could help them enhance the performance of their sales and marketing function by incorporating data backed insights.

Solution

To resolve this situation, we created a centralised management dashboard powered by POWER BI for data-driven decision-making.

Impact

This helped them in generating data-based insights in real-time for effective decision-making which resulted in forming better strategies for customer delight & satisfaction.

Enabled a Japanese Multinational Electronic Manufacturing Conglomerate to adopt Flexible & Digitised Shop floor Operations

Problem Statement

The customer was facing challenges with the shop floor productivity, along with inconsistent, fragmented data generated from a variety of machines and manual operations led to downtime and lack of productivity.

Solution

We integrated MOTIF FAS with HPE data fabric and MES system. It provides real-time visibility of shopfloor operation, stock forecasting alerts to managers and predictive insights for effective production planning

Impact

Centralised view of shop floor operations resulting in a decrease in downtime, and a better view of inventory planning.
