

Optimize Procurement. Maximize Returns

The Client

A leading Middle East government organization managing high-value, high-volume procurement across diverse departments, supporting critical infrastructure, operational, and public-sector initiatives, it mandates stringent compliance, transparency, and continuous audit preparedness.

Business Challenge

Manual processes created procurement bottlenecks, with no centralized contract repository or standardized templates, leading to audit vulnerabilities and integration failures across platforms. Weak module interdependencies resulted in data synchronization issues and excessive maintenance demands.

- Prolonged sourcing and contracting cycles
- Lack of centralized contract management
- Non-standardized templates and approvals
- Inadequate procurement module integration
- Elevated operational costs and audit risks
- Recurring data synchronization failures

Our Solution

Motherson Technology Services implemented Oracle Sourcing, Procurement Contracts, iSupplier, and Purchasing, creating an integrated, real-time procurement framework.

Financial Governance:

Embedded budget controls to prevent overspend and ensure fiscal discipline.

Supplier Performance:

Deployed monitoring tools for comprehensive vendor evaluation and accountability.

Executive Dashboards:

Designed ECC-based analytics for real-time visibility into procurement metrics and spend analysis

Business Impact

A unified interface now manages all procurement—from routine to strategic—while the centralized repository expedites contract issuance and streamlines audits. Simplified integrations delivered a resilient, ERP-aligned system with enhanced stability.

Selected for specialized public-sector procurement expertise and Oracle mastery, Motherson Technology Services enabled seamless standardization without operational interruptions.

- Consolidated platform for diverse procurement needs
- Simplified cross-system integrations
- Automated ERP-native contract lifecycle management
- Expedited compliant contract delivery
- Fully searchable, centralized contract repository

Technology Stack

- Oracle E-Business Suite Advanced Procurement

Services Provided

- Process Consulting and Optimization
- End-to-End Product Implementation
- Functional and Technical Customizations
